

DATA PROCESSING INFORMATION

Thank you for your interest in our company. We take the protection of your personal data very seriously and want you as a customer or potential customer to feel safe and comfortable with us. Nowadays, insurance companies and insurance agents can only work with the aid of electronic data processing (EDP). This is the only way in which contractual relationships can be handled correctly, quickly and economically. EDP also offers the insured community better protection from misuse than the former manual system. Since 25th of May 2018 processing personal data which has been provided to us is regulated by the General Data Protection Regulation (GDPR). According to the GDPR the processing and use of data is only permitted if the data subject has given consent to the processing of his or her personal data for one or more specific purposes or processing is necessary for the performance of a contract to which the data subject is party or in order to take steps at the request of the data subject prior to entering into a contract (cf. article 6 GDPR). In addition, there are various formal documentation and information obligations which we have to comply with when processing your data.
